## ENVIRONMENTAL POLICY

- ➔ As a plastic processing company, we recognize the responsibility we have regarding the environment.
- ➔ We are constantly working to make our production of plastic products more sustainable.
- ➔ In particular, we are working to reduce resource consumption in terms of materials, transport and energy.
- ➔ The use of recycled raw materials and the reclamation of our own plastic waste are in focus.
- ➔ To support our professional competence, we are a member of the organization "Plast Industrien i Danmark" (Plastic Industry in Denmark).
- ➔ As a part of our environmental focus, we are a proud member of Operation Clean Sweep, having pledged to implement the OCS programme for achieving Zero Pellet Loss.
- ➔ We manufacture our products at our own factory in Denmark. The short transport route for our products within Europe burden the environment much less, with regard to CO<sub>2</sub>-emissions, than products imported from Asia to Europe. A more environmentally friendly process.
