

SUSTAINABLE PRODUCTS

IS NOT ONLY A MATTER OF MATERIALS...

WHY SHOULD YOU BUY OUR RECYCLED PRODUCTS:

- ➔ We manufacture our products at our own factory in Denmark. The short transport route for our products within Europe burden the environment much less, with regard to CO²-emissions, than products imported from Asia to Europe. A more environmentally friendly proces.
- ➔ Our production and working environment is consistent with Danish/European laws. The Danish Labor Inspectorate carries out unannounced inspections at our factory up to several times a year.
- ➔ Our many recycled products are only manufactured by "Post Industrial Waste". This ensures that our recycled raw materials have a higher degree of purity.
- ➔ We are constantly expanding the number of products made from 100% recycled material. By increasing sales of recycled products, we support the circular economy.
- ➔ Our products have a long lifetime and therefore contribute to a sensible resource utilization.
- ➔ We work to reduce resource consumption in terms of materials, packing, transport and energy.
- ➔ Our certificate from Operation Clean Sweep commits us to maintain zero pellet loss in our production.
- ➔ We have received the code of conduct from the german GWW - Gesamtverband der Werbeartikel-Wirtschaft e.V. - a sign that we comply to professional and ethical guidelines within our industry.
- ➔ In 2017 we were voted the most socially responsible company in our municipality.
- ➔ To support our professional competence, we have joined the organization: "Plastic Industry in Denmark"
- ➔ Last but not least, we listen to our customers...
